Professional Skills

Work Experience

Software Engineer, Full Stack [at Keyavi](#)

Oct, 2021 - Present

Keyavi provides studios and creators with policy-based control that allows them to protect their business assets with end-to-end enforceable restrictions over users, locations, time access, and more.

- Design, build, and maintain efficient, reusable, and reliable software solutions employing API frameworks, .NET libraries & applications including .NET MAUI, and Azure cloud services.
- Develop and deliver future versions of Keyavi platform services including those designed for modern cloud deployments, REST / GraphQL APIs and microservices for application and platform integration.
- Support the development of mission critical features & functions by helping translate business requirements and use cases for new cybersecurity services into technical design, functional applications and secure, scalable deployments. Review, test, and verify code for adherence to quality and security standards
- Continually invest in personal learning, technical growth, process improvements and team cohesion to become a strong contributing member of Keyavi.

AzureASP.NETC#React

Full Stack Developer [at GovTact](#)

Nov, 2019 - Sep, 2021

GovTact supports IT infrastructure and application modernization for multiple government and commercial partners, ensuring mission readiness and operational security.

- Work on the front line of the research, development, design, and deployment of a state of the art visualization tool that taps into enterprise-level data sources that will revolutionize the way our customer interacts with their data.
- Responsible for designing, testing, coding, and developing solutions to meet customer needs; ensuring software continues to function normally through software maintenance, upgrade, and testing; documenting the application, service and environment as a reference for future operations and maintenance, including version and platform upgrades
- Develop in an AWS cloud environment using cutting edge technology.

AWSC#ASP.NETJavascript

.NET Full Stack Developer [at eTranService](#)

May, 2017 - Oct, 2019

eTranService anticipates and adapt to a changing world by transforming advanced technologies into value for our clients through professional solutions, services, and a process-driven workforce.

- Create or modify applications based on direction from the Software Architect.
- Work with Software Architect to determine level of effort required for a feature, user story, or task.
- Work with Data Management team to ensure successful cloud data structure/access for migrated applications.
- Assist in evaluating applications/tools readiness level for Cloud environments.

C#ASP.NETKanbanReact

Education

2013 - 2017

Bachelor's degree of Computer and Information Engineering from University of Cambridge
